1. INTRODUCTION.

This operating note provides information on each of the available accessories for Hewlett-Packard Models 4274A and 4275A Multi-Frequency LCR Meters. These accessories include; four test fixtures (HP Models 16047A/B/C and 16034B), three test leads (HP Models 16048A/B/C), and one dc bias controller (HP Model 16023B). Each accessory is pictorially shown, along with a description, in Table 2. Typical characteristics for the test fixtures and leads are listed in Table 1. To order additional copies of this operating note, use the part number listed on the rear cover.

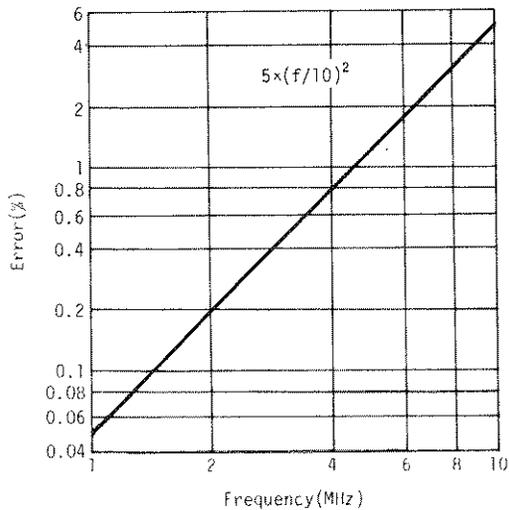

2. MAINTENANCE.

An exploded view of each accessory is shown in Figures 1 thru 8. Do not disassemble any further than shown. Maintenance consists principally of cleaning and replacing damaged or worn parts. Figures 9 and 10 show the internal wiring for the 16047A and 16023B respectively. Take special care when cleaning contacts. Figures 1 thru 8 also include a replaceable parts list. To order these parts, identify them by their Hewlett-Packard part number. If a faulty part is located in a part that cannot be disassembled, order the next higher assembly or return the whole device to the nearest Hewlett-Packard Sales/Service Office for repair or replacement.

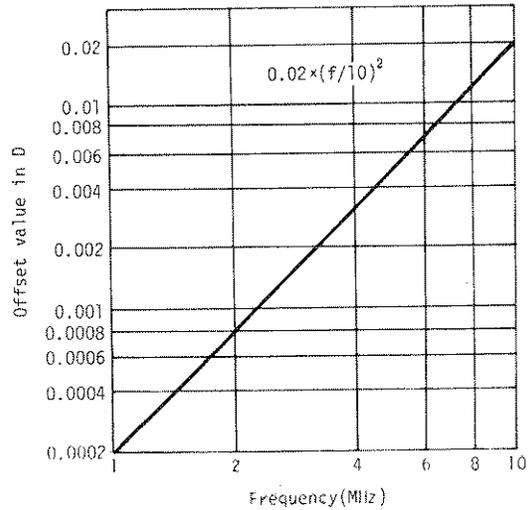

Table 1. Typical Characteristics of Test Fixtures and Leads.

Model	Applicable measurement ranges		Incremental error at freq. $\geq 1\text{MHz}$	
	Parameter value	Measurement frequency	Parameter reading error	Offset value in D
16047A	Full range	Full range	$\pm 5 \times \left(\frac{f}{10}\right)^2 \%$	$\pm 0.02 \times \left(\frac{f}{10}\right)^2$
16047B	Full range	below 2MHz	—	—
16047C	Full range	Full range	$\pm 1 \times \left(\frac{f}{10}\right)^2 \%$	$\pm 0.01 \times \left(\frac{f}{10}\right)^2$
16048A 16048B	Full range	Full range	$\pm 5 \times \left(\frac{f}{10}\right)^2 \%$	$\pm 0.02 \times \left(\frac{f}{10}\right)^2$
16048C	C > 1000pF L > 100μH	below 100kHz	Residual parameter values : C < 5pF, L < 200nH, R < 10mΩ	
16034B	Ranges satisfied $ Z > 50\Omega$	Full range	$\pm 5 \times \left(\frac{f}{10}\right)^2 \%$	$\pm 0.02 \times \left(\frac{f}{10}\right)^2$
			Residual parameter values : C < 0.02pF, L < 30nH, R < 50mΩ	

Note: f is measurement frequency in megahertz.
The incremental errors calculated from the equations in the table for measurements at frequencies above 1MHz are additive.

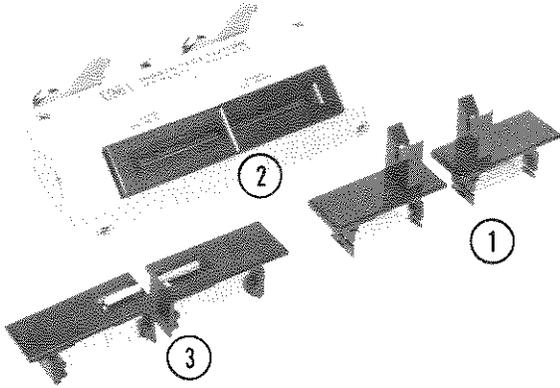

Parameter reading error vs frequency.

Offset value in D vs frequency.

Table 2. Descriptions (Sheet 1 of 4).

16047A

TEST FIXTURE - direct attachment type

This test fixture 16047A is available for general measurement of both axial and radial lead components. For axial lead component measurement, contact ① is used. For radial lead component measurement, two kinds of contacts, ② and ③, are applied.

16047A Test Fixture is directly coupled to 4274A or 4275A with 4-terminal pair configuration.

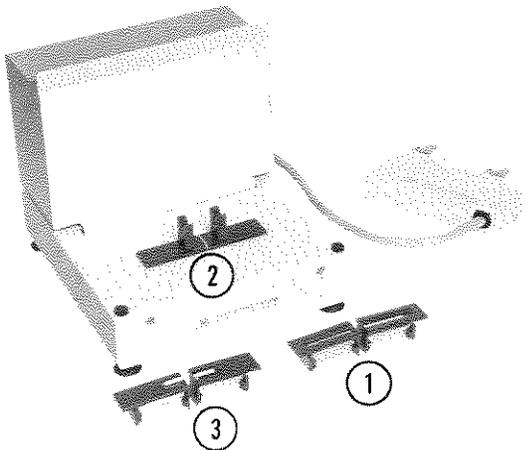

16047A is useable on all 4274A and 4275A ranges.

A DC bias up to $\pm 35V$ can be applied.

- ①: Contact for axial lead components
(HP P/N 16061-70022)
- ②: Contact for general radial lead components
(HP P/N 16061-70021)
- ③: Contact for radial short lead components
(HP P/N 16047-65001)

16047B

\$580.-
FEB '81

TEST FIXTURE - cable connection type

This test fixture 16047B is available for general measurement of both axial and radial lead components. The same contact electrode modules as those furnished with the 16047A are furnished with the 16047B.

The main chassis is coupled to 4274A or 4275A with a 4-terminal pair cable.

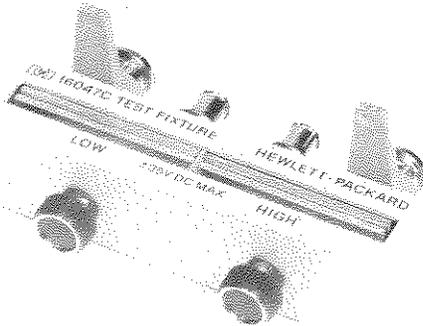

16047B is useable on all ranges below 2MHz.

A DC bias up to $\pm 200V$ can be applied (a protect cover is provided for operator safety).

- ①: Contact for general radial lead components
(HP P/N 16061-70021)
- ②: Contact for axial lead components
(HP P/N 16061-70022)
- ③: Contact for radial short lead components
(HP P/N 16047-65001)

Table 2. Descriptions (Sheet 2 of 4).

16047C

TEST FIXTURE - direct attachment type

This test fixture is appropriate for high frequency measurements requiring high accuracy.

16047C Test Fixture is directly coupled to 4274A or 4275A in 2-terminal configuration.

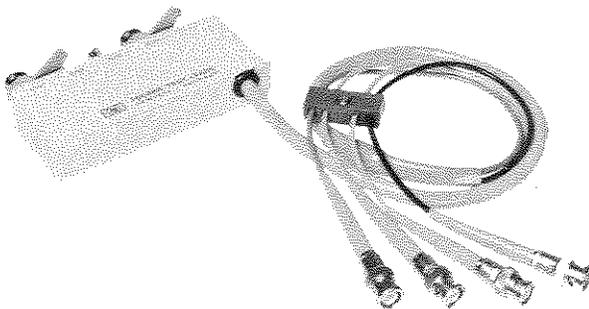

Two screw knobs facilitate and ensure optimum contact of electrodes and sample leads.

16047C is useable on all 4274A and 4275A ranges.

A DC bias voltage up to $\pm 35V$ can be applied.

16048A

\$250.--

TEST LEADS - BNC four terminal pair type

These test leads with BNC-BNC connectors are available for connecting user-supplied test fixture with 4274A or 4275A.

A DC bias up to $\pm 300V$ can be supplied.

The cable length is 1 meter.

Table 2. Descriptions (Sheet 3 of 4).

16048B

TEST LEADS - BNC four terminal pair type

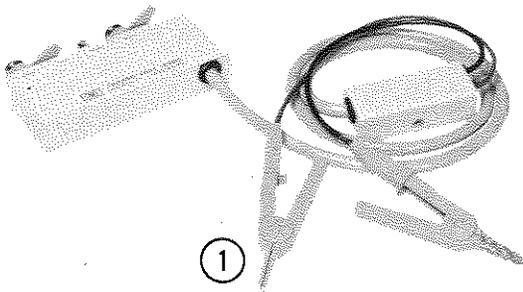

These test leads with miniature RF connectors are suitable for connecting user-supplied test fixture in system applications.

Maximum DC voltage $\pm 300V$ can be applied.

The cable length is 1 meter.

16048C

\$325.-

TEST LEADS - dual alligator clip type

These test leads with dual alligator clips are available for conveniently testing components of various shapes at frequencies below 100kHz.

Applicable measurement ranges:

Capacitance $> 1000pF$

Inductance $> 100\mu H$

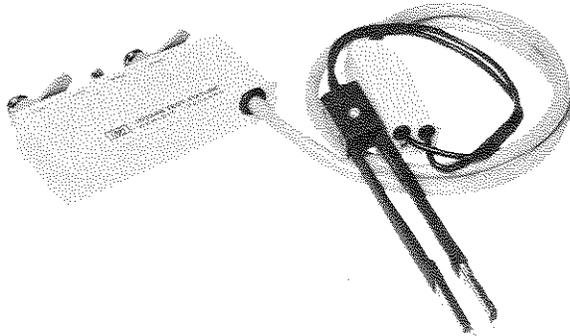

Maximum applied DC bias voltage is $\pm 35V$.

The cable length is 1 meter.

①: Probe ass'y
(HP P/N 16036-7511)

Table 2. Descriptions (Sheet 4 of 4).

16034B

TEST FIXTURE - tweezer type

This test fixture is suitable for measurement of miniature lead-less components such as chip capacitors.

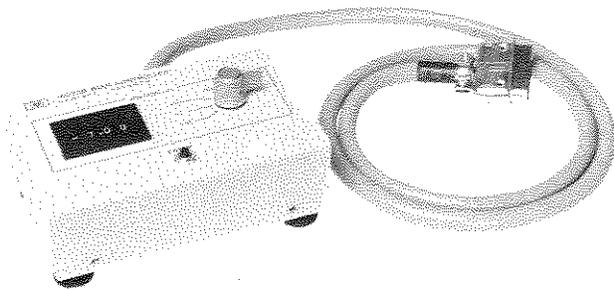

16034B employs a three terminal configuration tweezer probe fitting for high impedance component measurements (above 50Ω) on all 4274A and 4275A frequency ranges.

Maximum applied DC bias voltage is $\pm 35V$.

The cable length is 1 meter.

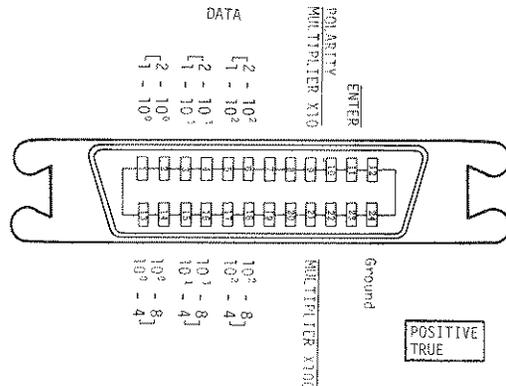

16023B

\$ 300.-
Feb 81

DC BIAS CONTROLLER - option 001 or 002 units

This controller is used to set the value of the internal dc bias voltage. Internal dc bias voltages of ± 0 to $\pm 35V$ for Option 001 and ± 0 to $\pm 99.9V$ for Option 002 can be selected using the four thumbwheel switches. A detailed description of the procedure to be followed for setting the internal dc bias can be found in Section III of the Operating Manual. The pin assignments for the connector are given in the figure below.

WARRANTY AND ASSISTANCE

This Hewlett-Packard product is warranted against defects in materials and workmanship. This warranty applies for one year from the date of delivery, or, in the case of certain major components listed in the manual, for the specified period. We will repair or replace products which prove to be defective during the warranty period provided they are returned to Hewlett-Packard. No other warranty is expressed or implied. We are not liable for consequential damages.

Service contracts or customer assistance agreements are available for Hewlett-Packard products that require maintenance and repair on-site.

For any assistance, contact your nearest Hewlett-Packard Sales and Service Office.

HEWLETT-PACKARD SALES AND SERVICE OFFICES

To obtain servicing information and order replacement parts, contact the nearest Hewlett-Packard Sales and Service Office in HP Catalog, or contact the nearest regional office.
