

Agilent 83487A Options 012, 014, and 017

Important notice—do not discard!

This package contains a 5 dB optical attenuator. Use the attenuator to maintain waveform fidelity when measuring signals with average power greater than $100\ \mu\text{W}$ ($-10\ \text{dBm}$). Refer to “Measuring High Power Waveforms” in Chapter 5 of the Agilent 83487A User’s Guide for more information.
